# G.E.C. JOURNAL

## OF SCIENCE AND TECHNOLOGY

VOLUME 31, 1964

Published by: **THE GENERAL ELECTRIC COMPANY LIMITED OF ENGLAND**

Head Office : 1 Stanhope Gate, London, W.1

Correspondence to : The Editor, Hirst Research Centre, Wembley, Middlesex

# INDEX

## volume 31, 1964

National Bureau of Standards
JUN 12 1971
156883
TK1
.G63

Inclusive page numbers for the year's issues are :

No. 1 (February) ..... 1 to 56
No. 2 (June) ..... 57 to 100
No. 3 (October) ..... 101 to 144

PAGE

**A**

Asymmetric phase effects in the circular-aperture aerial ..... 129
Automatic control of groups of lifts—a new concept on supervisory systems ..... 84
Automatic temperature control of large nuclear reactors ..... 11

**B**

Balancing—Mass, of large flexible rotors ..... 74

**C**

Carbon and graphite—structural features of ..... 28
Circular-aperture aerial—Asymmetric phase effects in the ..... 129
Compensators—60 MVA hydrogen-cooled synchronous ..... 123
Computer—New advanced core-store....(*brief*) ..... 113
Crystal growth techniques ..... 43

**D**

Deuterium-filled thyratron for high-power switching ..... 37
Developments in quartz-crystal units for frequency control ..... 133
Discharge lamps—Two new high-pressure ..... 92

**E**

Energy conversion—Thermomagnetic ..... 110
Environmental testing facilities—New, at Portsmouth....(*brief*) ..... 122
Equipment design and assembly—Rationalized packaging, a new approach to ..... 102

PAGE

**F**

Frequency control—Developments in quartz-crystal units for ..... 133

**G**

Galactic-noise radiometer for the second US/UK scientific satellite—A ..... 69
Gallium arsenide semiconductor devices ..... 114
Graphite—Structural features of carbon and ..... 28
Gun stabilization for the Chieftain tank ..... 139

**H**

High-power switching—Deuterium-filled thyratron for ..... 37
High-pressure discharge lamps—Two new ..... 92
High-pressure mercury-vapour discharge—Luminous efficiency of the ..... 3
Hunterston Nuclear Generating Station—some comments on its design, construction and commissioning ..... 59
Hydrogen-cooled synchronous compensators—60 MVA ..... 123

**L**

Lifts—Automatic control of groups of, a new concept on supervisory systems ..... 84
Luminous efficiency of the h.p.m.v. discharge ..... 3

PAGE

**M**

Magnetic fields—Research at low temperatures in high....(*brief*) .....91
Mass balancing of large flexible rotors 74

**N**

New advanced core-store computer ....(*brief*) .....113
New environmental testing facilities at Portsmouth....(*brief*) .....122
Nuclear Generating Station—Hunterston, some comments on its design, construction and commissioning .....59
Nuclear reactors—Automatic temperature control of large .....11

**P**

Packaging—Rationalized, a new approach to equipment design and assembly .....102
Phase effects—Asymmetric, in the circular-aperture aerial .....129

**Q**

Quartz-crystal units—Developments in, for frequency control.....133

**R**

Radiometer—A galactic-noise, for the second US/UK scientific satellite.....69
Rationalized packaging—a new approach to equipment design and assembly .....102
Researches at low temperatures in high magnetic fields....(*brief*).....91
Rotors—Mass balancing of large flexible.....74

PAGE

**S**

Satellite—A galactic-noise radiometer for the second US/UK scientific .....69
Semiconductor devices—Gallium arsenide.....114
Semiconductor devices—Standardized variable-speed drives using .....21
Stabilization—Gun, for the Chieftain tank .....139
Standardized variable-speed drives using semiconductor devices .....21
Structural features of carbon and graphite .....28
Supervisory systems—Automatic control of groups of lifts—a new concept on .....84
Switching—Deuterium-filled thyratron for high-power .....37
Synchronous compensators—60 MVA hydrogen-cooled .....123
Synopses .....56, 100, 144

**T**

Tank—Gun stabilization for the Chieftain .....139
Technical literature..... 54, 99, 143
Techniques—Crystal growth .....43
Temperature control—Automatic, of large nuclear reactors.....11
Temperatures—Research at low, in high magnetic fields....(*brief*).....91
Thermomagnetic energy conversion .....110
Thyratron—Deuterium-filled, for high-power switching .....37
Two new high-pressure discharge lamps .....92

**V**

Variable-speed drives—Standardized, using semiconductor devices .....21
